       - ▪ open_advanced_popup
         - ⇒ create_section
           - ◊ create_question

[1] Initializes user entry dictionary using default values if provided

[2] Uses dictionaries at beginning of programme to create questions by section

[3] LPT only

[4] Dropdown menus/radio buttons are mapped to integers for file creation

[5] Used for both Control and LPT tabs

[6] Infodom only

[7] Control only
